REACH

The REACH Regulation (Registration, Evaluation, Authorisation and Restriction of Chemicals) is an EU regulation that came into force on June 1st, 2007. It aims to better protect human health and the environment from the risks of chemical substances by obliging manufacturers, importers and users of chemicals to register, evaluate, authorise and restrict chemical substances.

The REACH regulation affects all companies that manufacture, import or use chemicals in the EU and aims to improve transparency and protection in the handling of chemical substances. In accordance with Article 33 of the REACH Regulation, our suppliers are obliged to actively inform us if an SVHC conspicuous ingredient above the critical value of > 0.1 % by mass is contained in the raw materials purchased. In addition, we proactively request information every six months from all our suppliers of materials and production aids in order to keep REACH compliance up to date.

Our goal at Avery Zweckform is to manufacture and distribute all products in compliance with REACH.

Do you need an up-to-date product-related REACH declaration of compliance? Contact us at: de.productcompliance@avery.com

Yours sincerely,
Avery Zweckform GmbH

Peter Spert
General Manager
